

## Agua Libra Upholstery Fabric

**Agua** is a specialist fabric with many inherent properties

It is important to look after the fabric to help maintain its appearance and condition. Most stains can be removed using the wipe clean method.

### Fabric Care

- **General care:** Regular vacuuming and wiping with a damp cloth to remove dust particles
- **Spillages:** remove quickly with an absorbent dry cloth
- **Minor soiling:** wipe with a clean damp cloth
- **Water based stains:** mild liquid detergent with warm water, rinse thoroughly followed by drying with an absorbent cloth. Use cold water for stains produced by bodily fluids.
- **Other stains:** use proprietary products, following the instructions on the container carefully
- **Hypochlorite or Alcohol based solutions:** can be used in extreme circumstances (Half a cup of household bleach with 5 litres of water- 10,000ppm)
- **Steam cleaning:** can be completed in situ
- **Machine Wash:** With care at 40°C. Covers must **NOT** be turned inside out and the zips **MUST** be closed. Remove from machine as soon as washing cycle is complete.
- **Line Dry**
- **Iron:** If necessary on the face side of the fabric only at medium temperature
- **DO NOT DRY CLEAN**
- **Always pre-test cleaners on a hidden piece of fabric to evaluate the colourfastness and texture of the fabric before proceeding with cleaning**
- **All soap residue must be rinsed out of the fabric as it will attract further stains**

**Please note that stains caused by bodily fluids should be removed immediately.**

**As with all fabrics, stains that have been left in situ for over 24 hours will have set and will become increasingly difficult to remove.**
