

Cleaning Instructions for Agua Taurus Faux Leather

General Cleaning:

To get rid of any dust or marks on the surface the Faux Leather MUST be wiped DAILY with a moist soft cotton cloth. Visible and loose dirt can be picked up with a vacuum cleaner (Do not use a brush type vacuum) Use a soapy microfibre or cotton cloth and gently rub stains with circular movements. For more stubborn marks a dilute bleach solution can be used, 5% Bleach to 95% Water to give 10,000ppm of available chlorine. Chlor-Clean, Haz Tabs and Tristel Fuse for Surfaces are suitable for use on Agua Taurus. Continued use and stronger solutions may damage the surface and cause the vinyl to crack

Stain Removal:

Blot excess liquid as quickly as possible with a clean microfibre or 100% cotton white absorbent cloth or sponge. If necessary use clean warm water. Clean the entire area where the spot occurred on the cushion, arm etc. Water may dissolve dirt particles and make cleaning easier. Spills that are still moist are the easiest to remove. Leave to air dry naturally, do not use a hair dryer etc to speed up the drying

- Coffee, tea etc spills: Use an absorbent white cloth or piece of paper. DO NOT RUB. Allow the stain to be absorbed and removed from the material surface. Then rub gently with white microfibre cloth or tissue paper in circular movements to remove any remaining dampness and residue
- Ink, Ball point pen, Denim: These are almost impossible to remove once set. Rub the stain by means of gentle circular movements with microfibre cloth or tissue dampened with alcohol and water (1:1) After this rub the surface with gentle circular movement with tissue paper to dry it. Continued use of alcohol based solutions may damage the surface and cause cracking.
- Butter, oil, grease stains: Wipe excess butter, oil or grease off the surface with a clean microfibre cloth or 100% Cotton white dry cloth. Use a soapy cotton cloth and gently rub the stain with circular movements. Use a clean damp cloth to wipe the area and dry the surface
- Chewing gum: Place ice cubes in a plastic bag and apply on the chewing gum. Wait several minutes, lift the ice bag and remove the chewing gum

DO NOT USE CHEMICALS, SADDLE SOAP, CLEANING SOLVENTS, FURNITURE POLISH, OILS, VARNISH, ABRASIVE CLEANERS OR AMMONIA IN WATER AS THESE WILL DAMAGE THE FABRIC

It is crucial that any staining is treated immediately. Delays in cleaning will give stains time to react with the plasticiser in the faux leather making it more and more difficult to remove

Note: These are recommended or suggested methods of cleaning. The manufacturer is not responsible for damage incurred while cleaning. Always try the cleaning method in a hidden area first to see the results. Remember if you are not sure contact your customer representative before proceeding
